Personal Development Plan

Professional Academic

Name: **Vinit rajesh dudalkar**

Course: **B.Tech in IT ar/vr**

Sec: **22**

Reg. No. : **PROV/ASAC/BTECH/7/25/1180**

Personal Vision Statement:

My vision is to becomea skilledArtificial Intelligence professional capable of developing intelligent systems that solve real-world problems efficiently. I aim to contribute to advancements in AI research and practical applications by combining innovation, data-driven decision-making, and ethical responsibility.

Current Situation:

I am currently pursuing a B.Tech in Computer Science and Engineering with a specialization in AI & ML. I have developed foundational knowledge in programming, data structures, and machine learning algorithms. My next focus is to strengthen my expertise in deep learning, natural language processing, and AI-driven automation through hands-on projects and internships.

SMART Career Goals:

Specific: Secure a position as an AI/ML Engineer at a reputed tech company.
Measurable: Complete certifications such as TensorFlow Developer and AWS AI Practitioner.
Achievable: Dedicate consistent time daily to practice Python, ML models, and research papers.
Relevant: Directly aligns with my specialization in AI & ML.
Time-bound: Achieve these goals by the end of **2026**.

Skills to Develop:

Machine Learning & Deep Learning Python and Data Analysis Natural Language Processing Model Optimization and Deployment Research and Communication Skills
